Statistics shown in this report describe a parks system without equal in Canada. Since 1944 its number of Provincial Parks has increased from only 8 to 115. In the past 10 years, the number of Provincial Parks has more than tripled. Last year, the number of visits to parks rose by another one and a half million to 13,658,619. And as our surveys show, the large majority of these visits was made by Ontarians.

Services have increased to park visitors, too. Our highly successful interpretive programme—still growing, afforded 892,760 visitors with a few minutes or few hours of increased pleasure and understanding last year. Many Provincial Park facilities were modernized, in keeping with high maintenance standards necessary for a leading parks system developed for popular use in a natural setting.

Yet our changing society brings still added challenges to the Provincial Parks system. Increased leisure time, population growth, and the expressed need of millions of people for outdoor recreation is placing heavy demands on the Provincial Parks. As the average rate of occupancy indicates, several Provincial Parks are reaching capacity, and many families have to be turned away. The Parks Branch will continue to direct itself to this issue in forthcoming years. Our efforts to improve planning, acquire more parkland, develop more recreational use of public lands, and encourage year-round recreational use may ease the problem of too much pressure on some Provincial Parks.

J. Keenan
Director
